

# Meighen's Resignation As Leader of Conservatives Hangs Fire

If It Will Help  
Alberta the  
Bulletin Is for It

VOL. XVII, No. 111.

EDMONTON, ALBERTA.—Alberta's Oldest Newspaper—MONDAY, OCTOBER 11, 1926.

HOME  
EDITION

PRICE FIVE CENTS

"Eyesight is Endangered by Fragments of Hammer," a headline says—Thanks for the warning, but we had no intention of putting fragments of hammers in our eyes.

We read that the slender, haphazard figure for girls will be a fashionable next year—Someone's decided we need bigger and better fashions!

H. G. Wells' new book is condemned as an insult to British royalty, but a guy who could write the "Outline of History" evidently has a perverted sense of humor.

An American paper says a four-year-old girl has just been her first picture play, "she having had no opportunity to see movies in London where she has been staying."—Now that's tell one.

CLARENCE BARROW, DE-CLARENCE W. WILLY, HAS GONE TO THE PAPER?—WHY DOES HE WANT TO SEE HIS NAME IN THE PAPER?

One wants to know if Premier Meighen has ever done anything outstanding. We seem to have heard that he used to make parachute descents some thirty years ago.

"Canada's Liquor Laws Condemned in United States," says headline.—So are United States liquor laws.

The Medicine Hat News says: "Premier Meighen is the most prominent among children; grown-up people are the most prominent among children."—Well, we were always learning something.

"Two Thousand are Feared to be Lost in Pacific Typhoon," a headline says.—Make it Two thousand and one; we're feared too.

One's wants to know where is the busiest spot in the world.—So far as we can judge, it's the leading-house building when you're in a hurry to drop.

Mussolini is premier, foreign minister, minister of war, minister of justice, minister of aviation.—A regular theological seminary.

A NEW ENCYCLOPEDIA.—What the dear golden dreams of youth.

When you go out in search of truth, try by-and-by.

And seek your money in some fool's dream.

Drumming, still dreaming, we'd be millionaires.

And leave our hearts.

Most of the north.

One or two foolish dreams, they grew all warm.

We've gained experience, and now, we're set.

No one can take us.

No one can take us.

## MEIGHEN'S RESIGNATION AS LEADER OF CONSERVATIVES HANGS FIRE

### Meighen's Resignation As Leader of Conservatives Hangs Fire

Meighen's resignation as leader of the Conservative party hangs in the air, following his announcement that he would resign if the party failed to win a majority in the next general election.

Meighen's resignation as leader of the Conservative party hangs in the air, following his announcement that he would resign if the party failed to win a majority in the next general election.

## PARK PRESIDENT SCOTS SOCIETY

J. R. Park was elected president of the R. Andrew's Society for the season 1934-1935 at the annual meeting of that organization held Wednesday evening at the Alexandra hotel.

Other officers elected were: Honorary president, Dr. M. E. McKay; hon. vice-president, Marya Todd; J. McNeill, David Mitchell and John D. L. Laidlaw; first vice-president, W. Anderson; second vice-president, H. Melville; treasurer, William Muir; secretary, G. Hunter; standard bearer, J. Robertson; band master, T. Slater; medical officers, Doctors J. M. Williams, J. R. Smith and A. Melville; chaplains, Rev. Dr. D. G. McQueen and Rev. Thomas Tait; executive, J. Gray, J. R. Shilow, J. Muir, J. Murdoch, W. Gavin, J. Hutton and D. Anderson.

### \$1000 FOR HONESTY

PATER.—The Harcourt James de Korthchild recently lost her \$1,000 necklace. A pretty 18-year-old seamstress of the Rue du Faubourg found it while mending a suit of silk pieces in the shop. She passed it on to the department head with the remark that they were probably imitation pearls. When the identity of the jewels was established, the girl received a reward of \$1000.

### STUDY SKI SAFETY

GENEVA, Switzerland.—To cut down the number of accidents in the Alps, and to acquaint guides with the new methods of winter climbing, a school for ski guides is planned here. Many guides are excellent skiers, but lack the knowledge of winter conditions.

In Alaska reindeer milk is delivered frozen into milk and quart blocks.

## 'Quit Yer Ticklin', Jack!

Or maybe it was the story about the two Irishmen that made Fritz laugh. Anyway, he is the only laughing baboon in the world, according to his owner, Jack Lucadamo, of Newark, N.J.

## Love-Making in Esperanto Easy, Says British Lawyer

Marriage Ceremony Conducted in Universal Language  
Unique in London Records

LONDON, Oct. 9.—The first church of England marriage ceremony ever conducted in Esperanto ended today. Miss Schomay, an American, and a Jackson Coleman, London barrister, after a courtship carried on entirely in Esperanto. The two do not know each other's native language and plan to speak the "international" tongue throughout their married lives.

The bridegroom, or edistakunio, said that he had found Esperanto excellent for love letters. Because in it "you can express love more strongly than in any other language." He added that Fraulein Schomay had made a vow never to marry a man who did not know Esperanto and that she had refused to marry three other suitors on that ground.

Fraulein Schomay is the niece of a court musician to the late Emperor Franz Josef. Lord Hailstone and the Austrian minister in London attended the ceremony in St. George's church.

# Hudson's Bay Company

## Beneficial All Round.

T. L. Church, M.P. for one of the Toronto seats, says the Meighen Government was defeated because it did not declare strongly enough for high tariff.

If that is Mr. Church's bid for the privilege of occupying Mr. Meighen's shoes, here is hoping that he captures the footstool.

High protectionists could not but be delighted to follow a leader whom, obviously, protectionists than Mr. Meighen. And the low tariff crowd would be suited right down to the ground.

## A Deterrent to Migration.

No doubt a lot of western people are just about sufficiently disgusted with the weather to up stakes and move out of the country if they could only hear about some other part of the continent where the weather wasn't as bad or worse and where the chances of making a living were as good.

With storms in the Southern States, floods in the Middle States, rains on the Pacific coast and more storms in the eastern provinces, the temptation to migrate is modified by the knowledge that the farther away one gets from Alberta the worse he is likely to fare.

## The Growth of Trade.

Edmonton bank clearings continue to beat the records for last year by a million dollars or more per week.

There has been no general upward movement in prices in the meantime, such as would account for the difference. Prices in a good many lines have fallen.

The only explanation that explains it is that a million dollars more buying and selling is being done in the city per week now than was done a year ago.

Barring the super-optimist and the ultra-pessimist, who never will be satisfied with anything in this world, that rate of gain must be rapid enough to suit anybody.

## The Jasper Highway.

Arrangements Commissioner Davidson announces that highway work is being done by the Government of British Columbia to straighten out and improve the highway through the Crow's Nest Pass.

That will be good news to motorists living in southern Alberta, and to those elsewhere who contemplate a trip by road through the southern mountains.

But what this action of Alberta is more interested in is the completion of the highway to Jasper Park. Not much has been heard of that enterprise for some months.

What has become of the understanding that the Province would construct the highway to the Park this season, and the Dominion build through the Park?

The tourist season has about ended, and has been lost for as this route is being built. But there is another season coming, and if experience counts for anything that season may be all but lost unless there is development in the present public demand that there be no further delay.

## A Brite Path Forward.

Hon. R. B. Bennett, it seems, took the position that if any Alberta coal is to be shipped to Ontario by arrangement of the Meighen Government, it must be Conservative coal.

The announcement that a trial shipment would be made was given out in this way: the railways to time and compelling them to show why they could not or would not haul Alberta coal to Ontario at practicable rates.

The voters failed to take the bait. Perhaps it was too late too. The suddenness of the thing, on the eve of polling, made it look suspicious. Alberta elected only one Conservative, and none in a coal-mining district. Fifteen Conservative ridings in Ontario went Liberal.

Then, it now transpires, Mr. Bennett cancelled the arrangement. If Alberta and Ontario did not know how to show a lively sense of gratitude for favors to come they would not get the favors, so far as he was concerned. The Alberta miners could spend the winter waiting regrets out of their meagre stores, and their Ontario consumers could haul themselves with the fever of disappointment, for all the trial shipment plans he would leave behind him.

If there is any other explanation, except that the announcement of the trial shipment was a political dodge, the answer that explanation is pronounced the better for Mr. Bennett's reputation and for the future chances of Conservative candidates in this Province.

As the matter stands now the promise that such a shipment could be made was simply a bribe which it was never intended to pay unless the coal miners and coal users delivered their votes on trust; and which it may not have been the intention to pay in any case.

## Equipment

By EDGAR A. GUEST

Picture it out for yourself, my lad. You're all that the greatest of men have had. Two arms, two hands, two legs, two eyes, and a brain to use if you would be wise. With this equipment they all began. No start for the top and say, "I can."

Look them over, the wise and great. They take their food from a common plate. And similar knives and forks they use. With similar lares they tie their shoes. The world considers them brave and smart. But you're all the same when they made their start.

You can triumph and come to be ill. You can be great if you only will. You're well equipped for what fight you choose. You have legs and arms and a brain to use. And the man who has risen great deeds to do. He began his life with no more than you.

You are the handicaps you must face. You are the one who must choose your place. You must say where you want to go. How much you will study the truth to know. God has equipped you for life, but He lets you decide what you want to be.

Courage must come from the soul within. The man must furnish the will to win. So figure it out for yourself, my lad. You were born with all that the great have had. With your equipment they all began. Get hold of yourself, and say: "I can."

## Benevolent Donations

By DR. FRANK CHANE

Are endowed colleges, churches, hospitals and similar institutions good things or not? Most people think they are. But where question it some say that an institution becomes merely a house, furnishing a living to a lot of structures.

An institution is probably looked at most justly when it is regarded as the community's own tax upon itself. It then becomes a democratic affair because it is supported by the people and they have a constant right to criticize it. In criticism because too severe and it is thought to be well founded, the institution has difficulty in raising the money needed.

It is for this reason that large gifts like John D. Rockefeller's usually agree to contribute only a part and require the public to come in on the other part. This avoids creating the public's own responsibility to the public. If one man and makes it responsible to the public. If institutions are a public burden, then they should have a limited or a church, a university or an organization—then they should be supported by organized efforts.

One of the outstanding figures today in organized philanthropy is Charles R. Ward, of Flushing, Long Island. He is the originator of the "Public House" plan. He has been working for years, a group of interested men get together and plan to build a house in a week or ten days. He has organized the raising of some of the largest amounts ever raised for the Red Cross during the war.

The second of the first \$100,000,000 for the Red Cross during the war. Besides raising hundreds of millions during the war, Mr. Ward and his associates have since directed the raising of more than \$40,000,000 for hospitals, colleges, churches, Christian associations, Boy and Girl Scouts, orphanages, homes for the aged, and institutions for human betterment.

His plan is to get together voluntary helpers and organizers. These months of preparatory work is often tedious. The work of organization is done by voluntary workers. A prominent man who give up their time for a definite period during the year. They are not paid, but their labor may not be wasted by cross purposes. They are not paid, but their labor may not be wasted by cross purposes.

Today all over this country and even in Europe are thousands of buildings and institutions, centers of influence and beneficence, which are the result of this method.

Of course these institutions might be supported by the government, that is, handed down to the people. It is a public betterment, however, to have them supported by the people themselves. In short, to arrive from below.

## Do You Remember?

Forty Years Ago

From the Edmonton Bulletin, Saturday, October 11, 1886.  
 Winnipeg—Quinnell, an Indian scout, was held up at Maple Creek, near a Indian lady, who subsequently held up the police detachment sent to arrest him.

Battleford—The industrial school was opened here in the new building last week.  
 Battleford—A hospital, two barracks rooms, a new police station and a new school building for him here.

Indian Head—Garnett, accused of robbing the Prince Albert bank, has been sentenced to 14 years in the Manitoba penitentiary. The amount secured by him was estimated at \$1,100.

Winnipeg—Freight for the north is plenty and freight rates are low.  
 Calgary—Horse thieves are rampant. Seven horses were stolen lately at Cochrane, and there is news of other thefts daily.

White—A man north on Monday in company with Donald McLeod. They will look over their timber lands along the river and see what they can do.  
 Winnipeg—A serious accident occurred early in the morning. A man was killed by a horse-drawn carriage.

Winnipeg—A serious accident occurred early in the morning. A man was killed by a horse-drawn carriage.  
 Winnipeg—A serious accident occurred early in the morning. A man was killed by a horse-drawn carriage.

## THIRTY YEARS AGO

From the Edmonton Bulletin, Thursday, October 11, 1896.

Edmonton arrived in town on Thursday from the north, where he has been engineering on the H.B. steamer Graham for ten years.

K. Fetter has brought his gold mining story to Wabasca. Where he is laid up for the winter. He has been mining for some time. His gold worth of gold has been obtained.

Questions on Health and Diet Answered by Dr. McCoy, when addressed in care of The Edmonton Bulletin.

## HOW TO AVOID TUBERCULOSIS

There is nothing mysterious about the development of tuberculosis if the hush of the germ theory is forgotten and the fundamental reasons for its origin are studied. Of course, in a consideration of the causes leading to this prevalent disease one could trace from cause to effect in an unending chain, but to present this subject in a way to be easily understood I will arrange the causes into simple main classifications. In today's article let us consider:

## Faulty Breathing

With practically every patient who presents himself for diagnosis and treatment, it is possible to easily trace a predisposition to the disease by observing certain physical characteristics. The invariable rule is that he will have a smaller lower chest and the X-ray examination will disclose an almost immovable diaphragm. This diaphragm is a flat muscle separating the chest organs from those of the abdomen. It is the main muscle used in breathing and accomplishes this act of breathing by contracting and expanding in this way forces the air in and out of the lungs with a kind of bellows action. Those with the tubercular tendency always have a tight diaphragm which will not properly expand and the lower

time to read my articles each day and you will gradually learn how to overcome her trouble.

## Comment

LOOKS THE PART

Toronto Star: Kim Ferdinand of Rumania. It is announced, will not return, and from the port of publication in the press he certainly looks a man who would work.

## ON THE OTHER FOOT

OTTAWA Citizen: It would of course, be very anything to restrict the British people to be restricted by Canadian citizens upon the door of Great Britain being opened by the United States. But some officials - informed British visitors think they have a special mission to warn Canada against attraction.

## AS AN OFF-SET

Montreal Herald: The constitution of the British people to be restricted by Canadian citizens upon the door of Great Britain being opened by the United States. But some officials - informed British visitors think they have a special mission to warn Canada against attraction.

## A Thought

We beseech you, brethren, that you increase more and more, and that you force out the quiet, and to do your own business, and to work with your own hands, as we commanded you in 1 Thess. 4:11, 12.

# At last!

## a real cold weather gasoline

IT is no trick to make a gasoline that will start quickly. But to make such a gasoline without sacrifice of power and mileage, has long been a problem that has baffled the best brains in the oil industry.

The discovery of Ethyl Brand of Anti-Knock Compound--after 7 years' research in the General Motors Laboratories--has enabled us to solve the problem.

We produced a very special grade of quick-starting gasoline. We added this Ethyl ingredient. We thus achieved a gasoline that, while "light" enough to explode the moment the spark jumps, gives more power and longer mileage than any winter gasoline heretofore made or sold in Canada. And in addition, it makes your motor absolutely knockless. 4 cents more per gallon--but emphatically worth it.

Fill with Imperial Ethyl. In the first mile it will show its superior acceleration. On the first hill it will reveal its truly remarkable climbing performance. On the first cold morning it will prove its readiness in starting.

You will come to it some day soon--why continue to miss the driving thrills, the real motoring satisfaction, you can get by filling with Imperial Ethyl.
